That is a good start. The Region should be in a better position to evaluate the administrative record assertions being made. One additional complication is it looks like the remedy is being implemented using Iowa authority (since it is not under a Federal Consent Decree) so the formal dispute resolution might be between Iowa and the PRP.

The potential inconsistency with guidance might, however, impact EPA's ability to delete the site in the future and impact future EPA five year reviews.

Doug: What is the process for responding to a RP? Sandeep received a letter from Vogel (attached). Should he work with his attorney on a response and then share it with ARD?

Thanks,
Heather
